Visveswaran, Siva (Workforce Dev. & Corporate College)

to me, Parul

Thu, Jul 9, 10:58 AM

Terrance, This is what the Reachy kit we bought includes:

- Reachy Starter Kit + VR teleoperation (Color: white, Robotic arm right side)
- Reachy humanoid platform + VR teleoperation - v1.2
 - Includes:
 - 1 x 7Dofs bio inspired arm with force gripper
 - Expressive head with dual 1080p@30fps camera with motorized zoom (FOV 65° to 125°) and mobile a
 - Software based on ROS2 with Python SDK
 - Powerful internal computer (NUC)
 - Embedded TPU (Google Coral) for running ML models inference at high speed locally
 - Microphone array for NLU (ReSpeaker) and 10W speaker
 - Support mount to fix the robot onto a base
 - VR teleoperation - allows to control Reachy remotely
 - Ready-to-use Meta Quest 2 application

Per Pollen (now HF), "reachy2_sdk is only compatible with a Reachy 2 robot. If your Reachy is from 2021 or 2023 (Reachy 1.2), you sho on the robot, which is the reachy_sdk package"

The Greengrocer demo was built for sdk 2; specifically with a Perception module with integrated AI for object identification. I built a samp
